<b>Date of Exhibition</b>	: 26-29 June 2019
<b>Venue</b>	: Erbil International Fair
<b>Expected Exhibitors in 2019</b>	: 100

## Exhibition Topics

- Construction Technologies
- Construction Machinery
- Contracting Services
- Electricity and Energy
- Heating Cooling Systems

## Why Re-Construct Iraq 2019

ERBIL INTERNATIONAL FAIR

- The most comprehensive construction exhibition in Iraq.
- It's being organized with support of Iraqi government authorities.
- It is organized in Erbil which is 100% safe and the most popular expo city of Iraq.
- All time saving exhibition services are provided by the organizer such as stand construction, shipping, accommodation etc.

## Construction Materials

- "In the construction materials sector, local production is inadequate and covered by open imports. Parallel to the increase in oil revenues, infrastructure and superstructure investments will expand the construction and building materials market."
- The main cement suppliers are Turkey and Iran. There are other countries such as Pakistan and Jordan
- In ceramic tiles the preferred products are from Spain and Turkey, whereas in ceramic sanitary ware, Egypt, UAE and Turkey's products are popular.

## Housing and Roads

- Iraq needs at least 2 million housing units.
- The required investment amount is at least \$ 2 billion.
- The government's goal is to make every citizen a home owner in the next five years.
- As a result of the rising oil prices, Iraq's oil revenues increased which helped the government eliminate financial problems and made it able to finance the investment costs with its own resources.
- The total length of Iraq's highways is 42,000 km, 85% of which are asphalt roads.
- "According to the Ministry of Transport, a total amount of \$ 40 billion in investment is required for the renewal of the transport infrastructure (maintenance of existing roads and construction of new ones)."
- Another future project of the Iraqi government is to transform the country to a transit route. According to the plan, the ships arriving to the Arabian Gulf from the Far East (especially China) unload its goods imported to Europe in Basra, then transit the shipment to Europe through land route via Turkey.
